

QUALITY MANAGEMENT POLICY STATEMENT

Mermaid Drilling intends to maintain a position of excellence in the drilling services market through efficiency, safety, and quality performance. Our Quality Management System consists of an integrated management process that defines practical requirements to monitor and control the way that Mermaid Drilling conducts business. As a part of that system, Mermaid Drilling has a series of procedures to support the operational use of the Quality Management System.

Implementation of these procedures, in conjunction with our management philosophy and cost-effective planning, ensures that all work Mermaid Drilling undertakes is safe, efficient, and of the highest quality.

We recognize that we cannot achieve our goals without dedicated and experienced employees who understand and embrace the Quality Management System, enabling them to contribute to the continuous improvement of our service.
